Geodesic Dome & Tensile Fabrics

Transforming the future with membrane structure

**A Section of Ghumura concept
for Bhawanipatna Bus Stand**

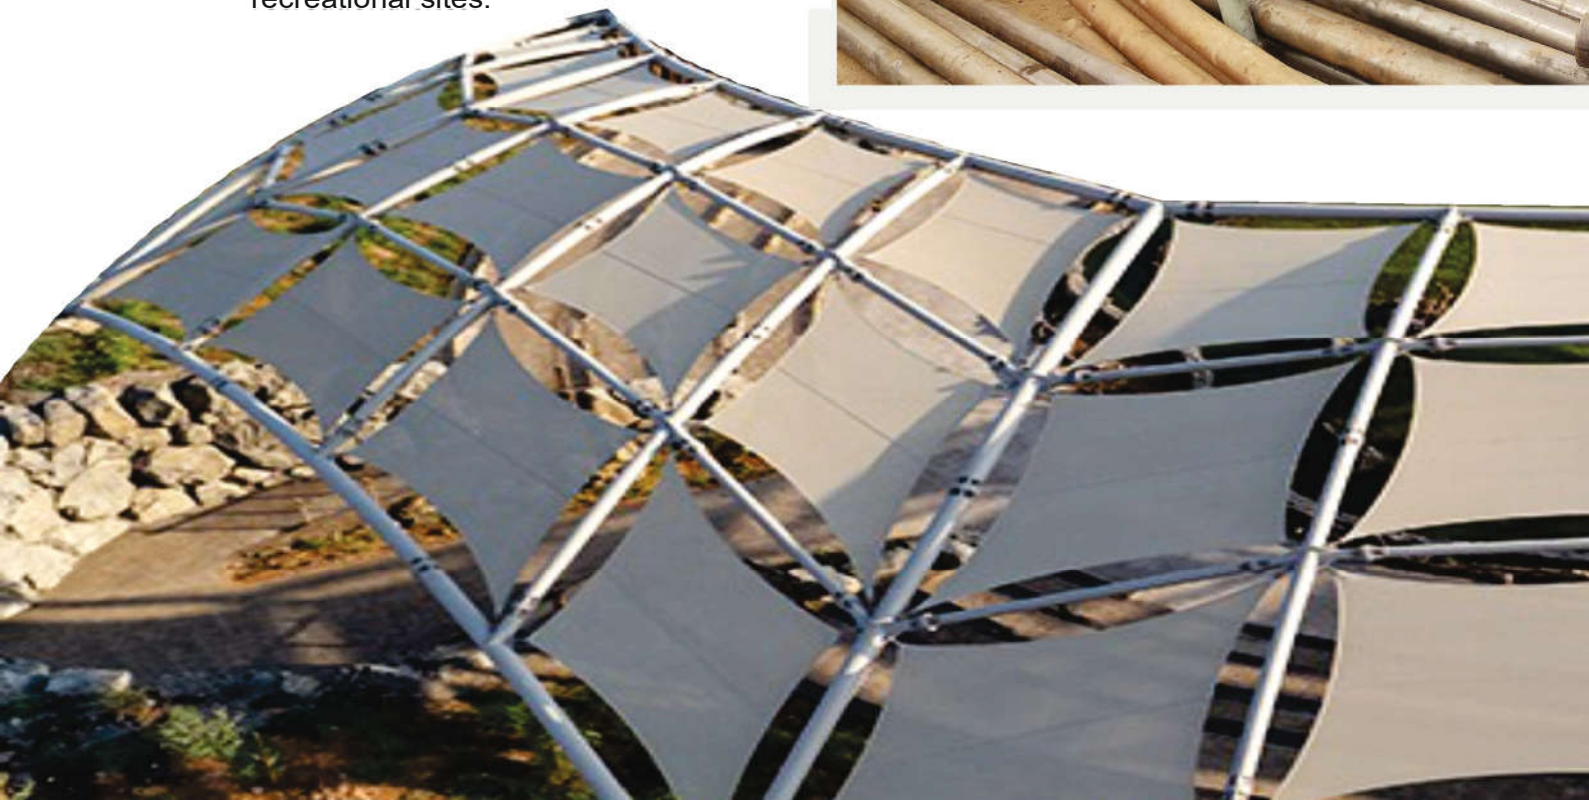

Ghumura

Company Profile

Tensfab Structures (TFS) is leading company in tensile membrane structures based in Bhubaneswar, East India which offers a full range of services from concept design to project implementation in fabric structures. Its flexibility fabric design allows a dramatic and beautiful form creating an outstanding attraction for venues and indoor and outdoor events in today's modern world.

With years of experience, we have a team of qualified personnel to work and execute the success of every project in membrane structures.

Our structures can be seen in many applications such as projects with government, local council, and public sector like in developer, transport, garden, bank, walkway and other recreational sites.

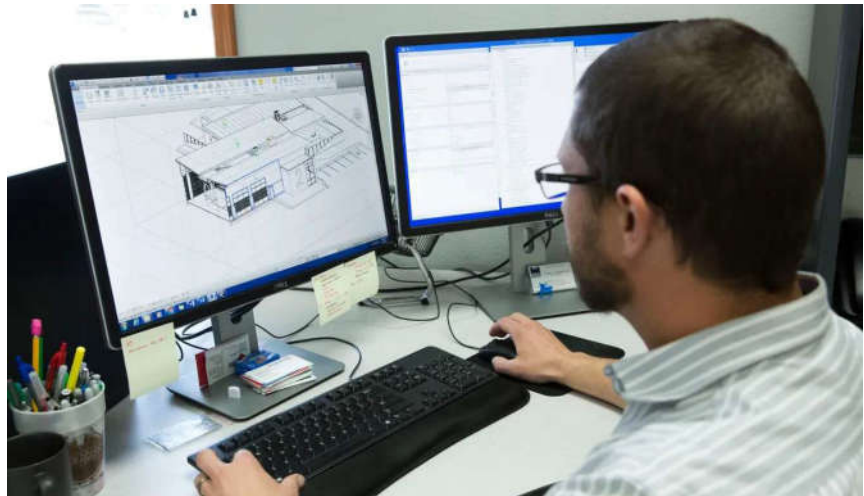

Design & Engineering

All type the structure is custom-designed solutions to meet the needs of the customer. All buildings are designed and constructed in accordance with the Indian Standards for applicable load. Buildings are designed and manufactured in accordance with the latest editions of the following codes:

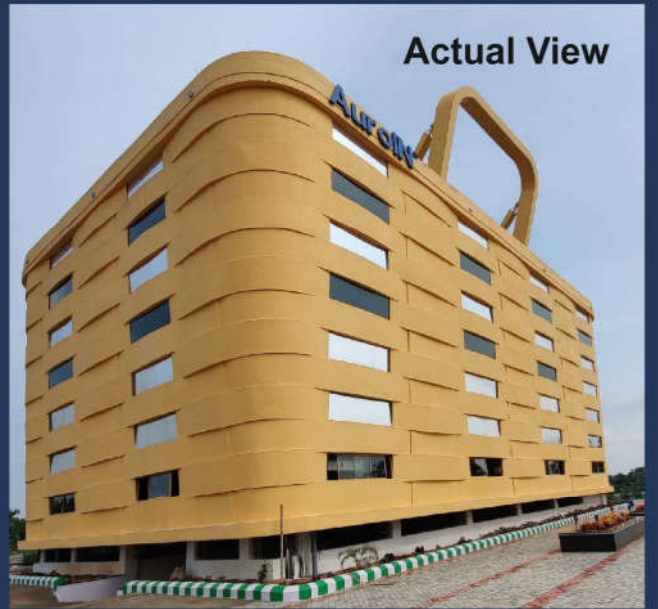

- IS 800: 2007
- IS 875
- Manual for Steel Construction, Allowable Stress Design (AISC) - American Institute of Steel Construction Inc., USA.
- Cold-Formed Steel Design Manual (AISI) - American Iron and Steel Institute, USA.

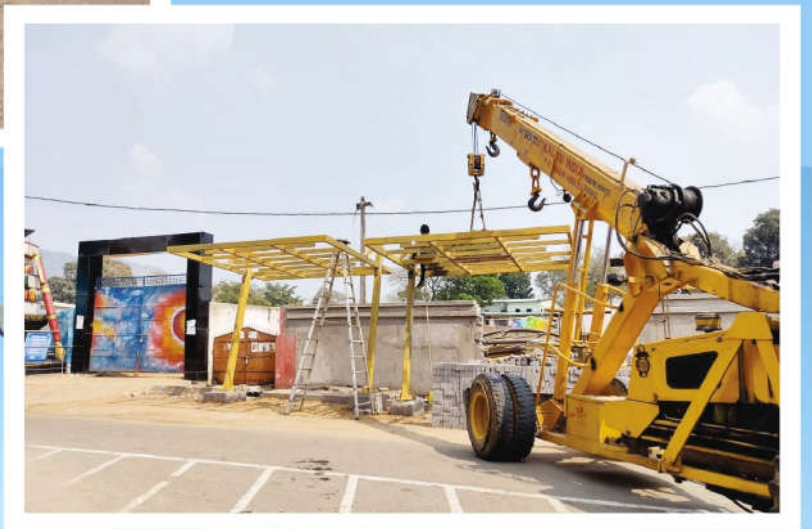

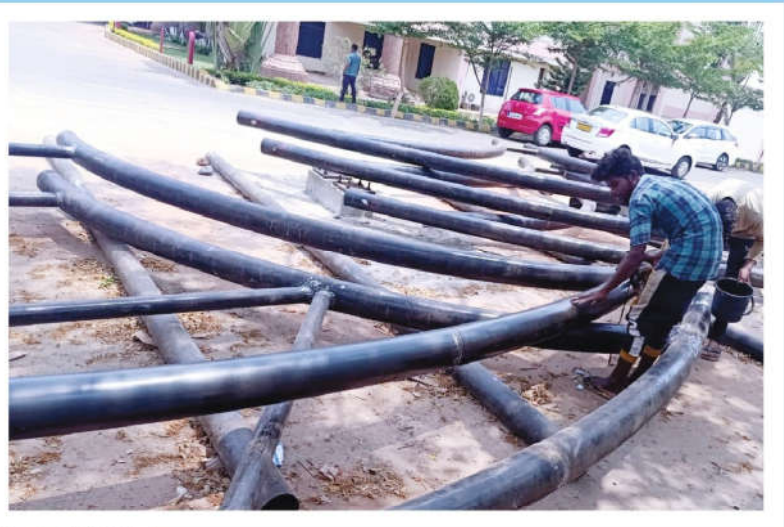

We offer comprehensive Engineering Services which include analysis, design, and project management services for

structural steel projects. We use latest analysis & connection design software which helps us design efficient, economical & safe structure/ connection in a limited span of time.

Pre Engineering Building

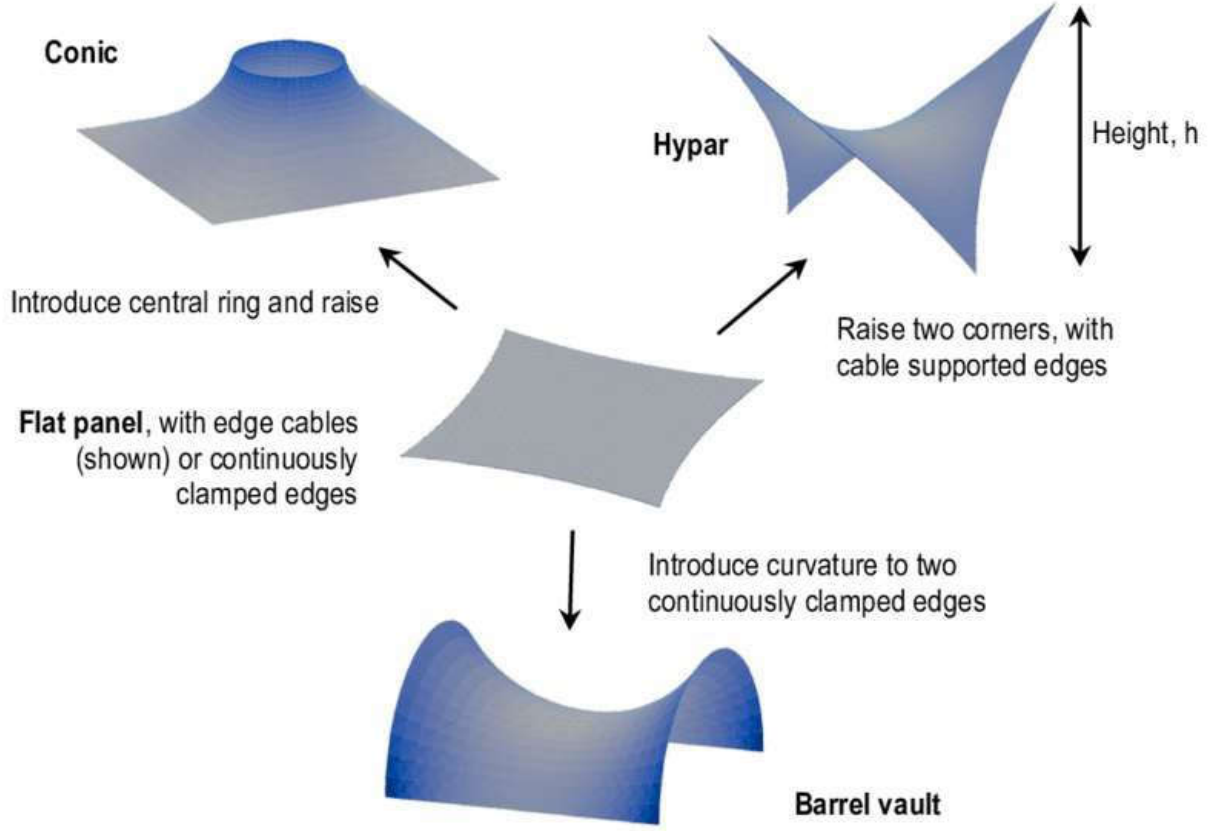

Polycarbonate Structural

Luxurious Tent

DD Sports Complex, Keonjhar

Application : Tensile Fabric Structure Canopy

Area : 1200 sqm.

Scope of work : Design, Fabrication, Erection, Tensile Roofing

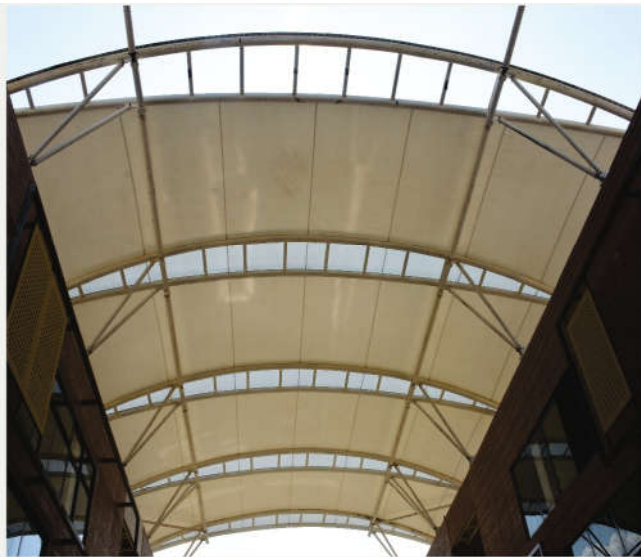

Tensile Fabric Structure

Grand Bazar, Nakhara, Bhubaneswar

Application : Tensile Fabric Structure

Area : 1930 sqm.

Scope of work : Design, Fabrication, Erection, Tensile Roofing

American International School, Delhi

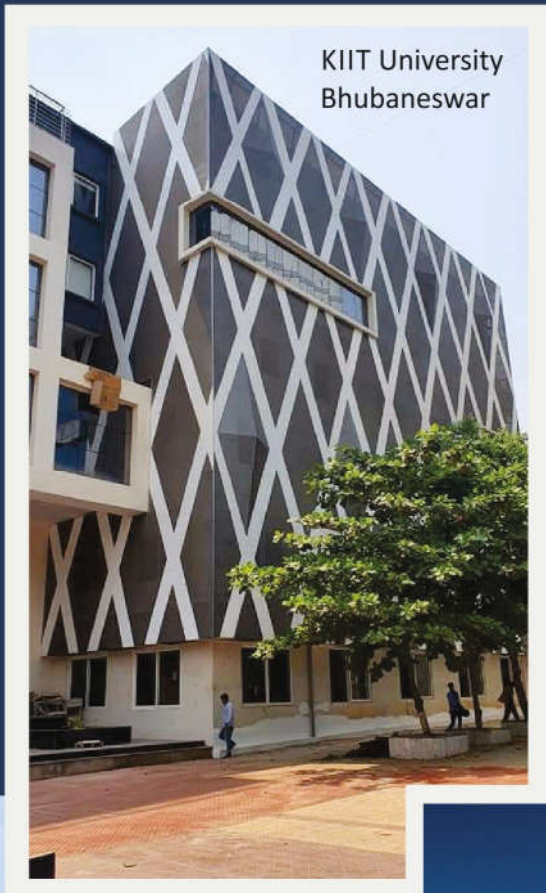

Application : Shade Sail

Area : 300 sqm.

Scope of work : Design, Fabrication, Erection, Tensile Roofing

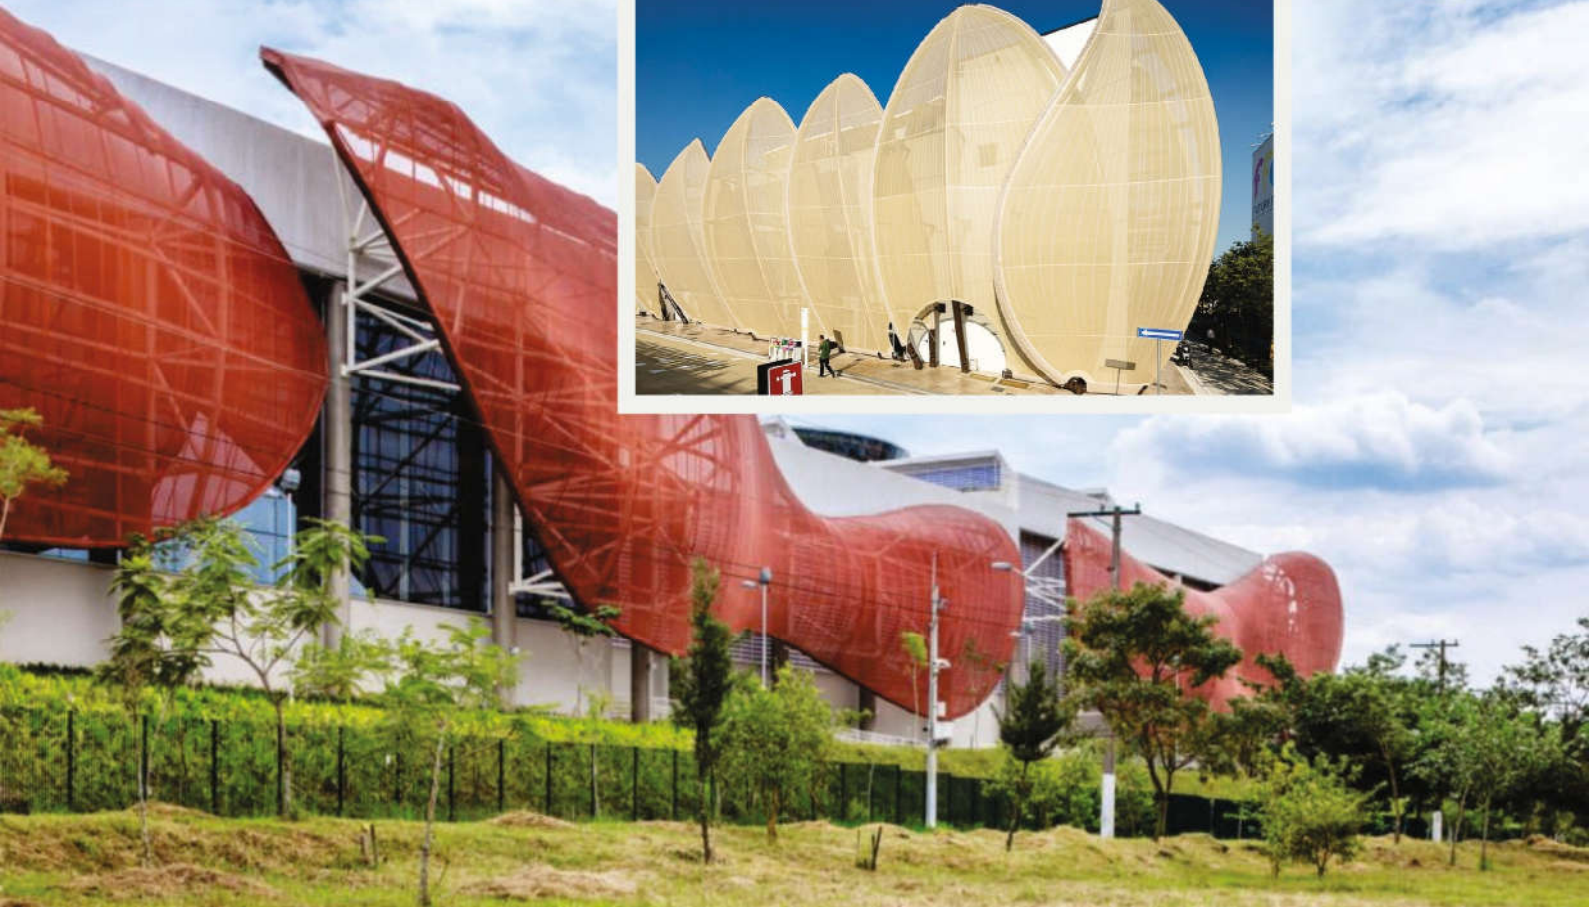

Tensile Fabric Facade

Tensafab structures specializes in the design, engineering, and installation of innovative architectural mesh facades. Our lightweight facade systems provide architects and developers with a cost-effective method of transforming the appearance of a building. In some instances, our customers use lightweight facades to alter the appearance of the building.

In addition to the privacy offered by architectural facade screens, mesh fabrics can also provide a solar shade to prevent the majority of sunlight from entering a building while still offering outward visibility. This helps reduce solar heat gain and can drastically reduce energy bills.

Service, Maintenance & Cleaning

All structures require some level of maintenance. Sunlight and time are two factors that deteriorate unmaintained structures. Tensafab structures offers maintenance agreements to keep your structure looking new.

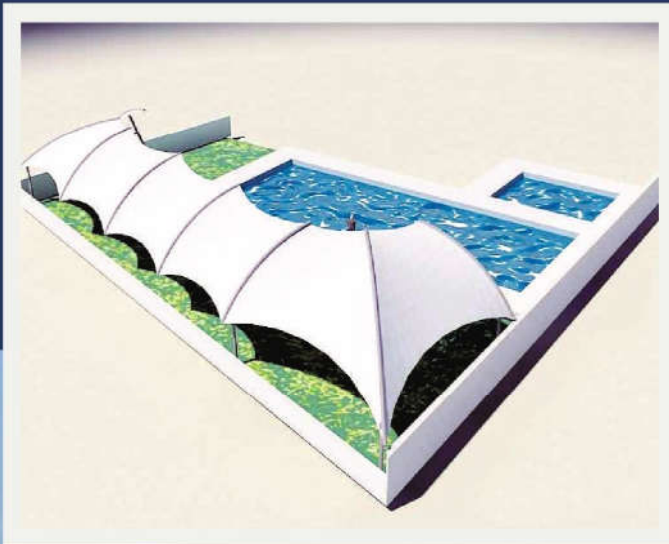

After assessing the damage, our team can replace the damaged portions of the structure or the entire structure if needed. This can even be an opportunity to upgrade your structure!

Services We Perform

- Inspections
- Re-tensioning
- Repairs
- Membrane replacement
- Renovations
